

Aero Inspection ready for the Airbus A350 XWB & Boeing 787

Aero Inspection is happy to announce that we have achieved EASA & FAA approval for borescope inspections on the Trent XWB and Trent 1000 engines as well as the HGT1700 & APS5000 APUs. After a yearlong preparation, and a training programme with Rolls Royce, Aero Inspection is now approved to complete borescope inspections on the Airbus A350 XWB & Boeing 787.

Airbus A350 XWB .

Peter Bagnell, Managing Director- Asia tells us that “These new approvals are an important part of our long term strategy. There is a current demand in the market to support the A350 and B787 operators, and we have positioned ourselves to support aircraft lessors for A350 and B787 Return Off Lease Inspections”.

Trent 1000 Turbofan Engine.

In tandem with this process Aero Inspection also achieved approval on the General Electric CF34 engine. “With aircraft demand in Asia and Europe forecast to increase steadily until 2035 there are very strong prospects for regional jets. We are delighted to have the expertise and approval to support this market” added Peter.

Mr Gary Tan, Aero Inspection Certifying Staff, receiving training from Rolls Royce.
